

Case Study

Haileybury College Fibre Optic Infrastructure upgrade

Project:

- Haileybury College required a fibre optic infrastructure upgrade across three campuses for their iPad roll out

The Macmor team:

- Designed and constructed a state of the art certified OSI single mode fibre optic solution
- Retained the existing system for redundancy purposes, and completed a seamless change over for the I.T.C department
- Provided the college with the speed and bandwidth required to run iPads for all students and staff across the three school campuses
- Completed the crucial upgrade at all three campuses within the six week school holiday period to ensure no disruption to classes
- Delivered a certified solution with a fifteen year warranty provided to the college
